

Capital Cost Evaluation for Optimum Process Design of Cryogenic Air Separation

Diploma Thesis
by
Robert Pack

London, SS 2012

Table of Contents

1	Introduction	1
2	Air Separation Technology	2
2.1	Membrane Processes	2
2.2	Pressure Swing Absorbtion	2
3	Cryogenic Air Separation	4
3.1	Process Model	4
3.2	Uncertainty in Process Modelling	4
3.3	Capital Cost	4
4	Conclusion and Further Research	6

List of Figures

2.1	Comparison of Air Separation Technologies.	3
3.1	Air Separation Unit	5

List of Tables

1 Introduction

2 Air Separation Technology

2.1 Membrane Processes

2.2 Pressure Swing Absorbtion

3 Cryogenic Air Separation

3.1 Process Model

3.2 Uncertainty in Process Modelling

3.3 Capital Cost

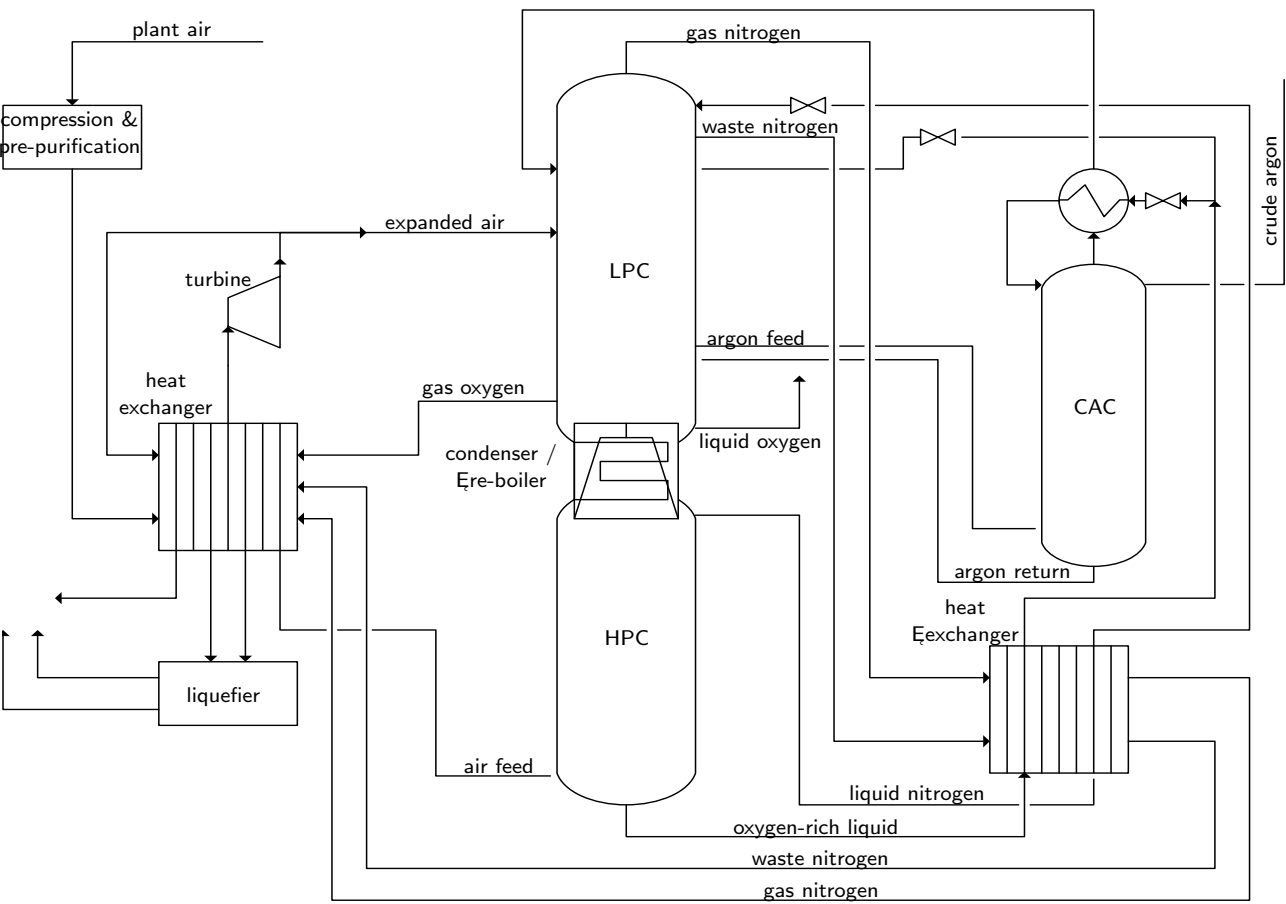

Figure 3.1: Schematic representation of the cryogenic air separation process.

4 Conclusion and Further Research

Todo list
